

Company Introduction:

MITRO is glad to make partial contribution to the 7th Young Researchers BNCT Meeting due to its strong capability and promising future in the battle against tumor. We especially feel honored to have this opportunity to support young scientists that we all once were.

MITRO Biotech (Molecular Imaging Translational Research Organization) is the first Molecular Imaging CRO company in China. MITRO is committed to offering functional images in the evaluation of pharmacodynamics and pharmacokinetics of new drugs and molecular probe development, a novel time-saving approach to support new drug invention, from preclinical to clinical. We aimed to bring medical research in China to a better world.
